

# PROJECT PRESENTATION

## FINAL

# Introduction

## ❖ Problem

Ease the identification of the marks of metal and pipeline components from images.

## ❖ Solution

Automated, fast, and accurate recognition that enhances productivity in the pipeline construction industry.

# Roles

**ANASTASIA  
BARABNOVA**  
TEAM LEAD &  
FRONTEND DEV

**GUZEL  
ZAKIROVA**  
FRONTEND DEV

**ANASTASIA  
SMIRNOVA**  
BACKEND DEV

**AMIRLAN  
SHARIPOV**  
BACKEND DEV &  
DEVOPS ENGINEER

**EGOR  
ZAVRAZHNOV**  
DATABASE &  
DEVOPS ENGINEER

**YAKOV  
DEMENTYEV**  
CV ENGINEER

**DARINA  
MERZAKREEVA**  
CV ENGINEER &  
TECH WRITER

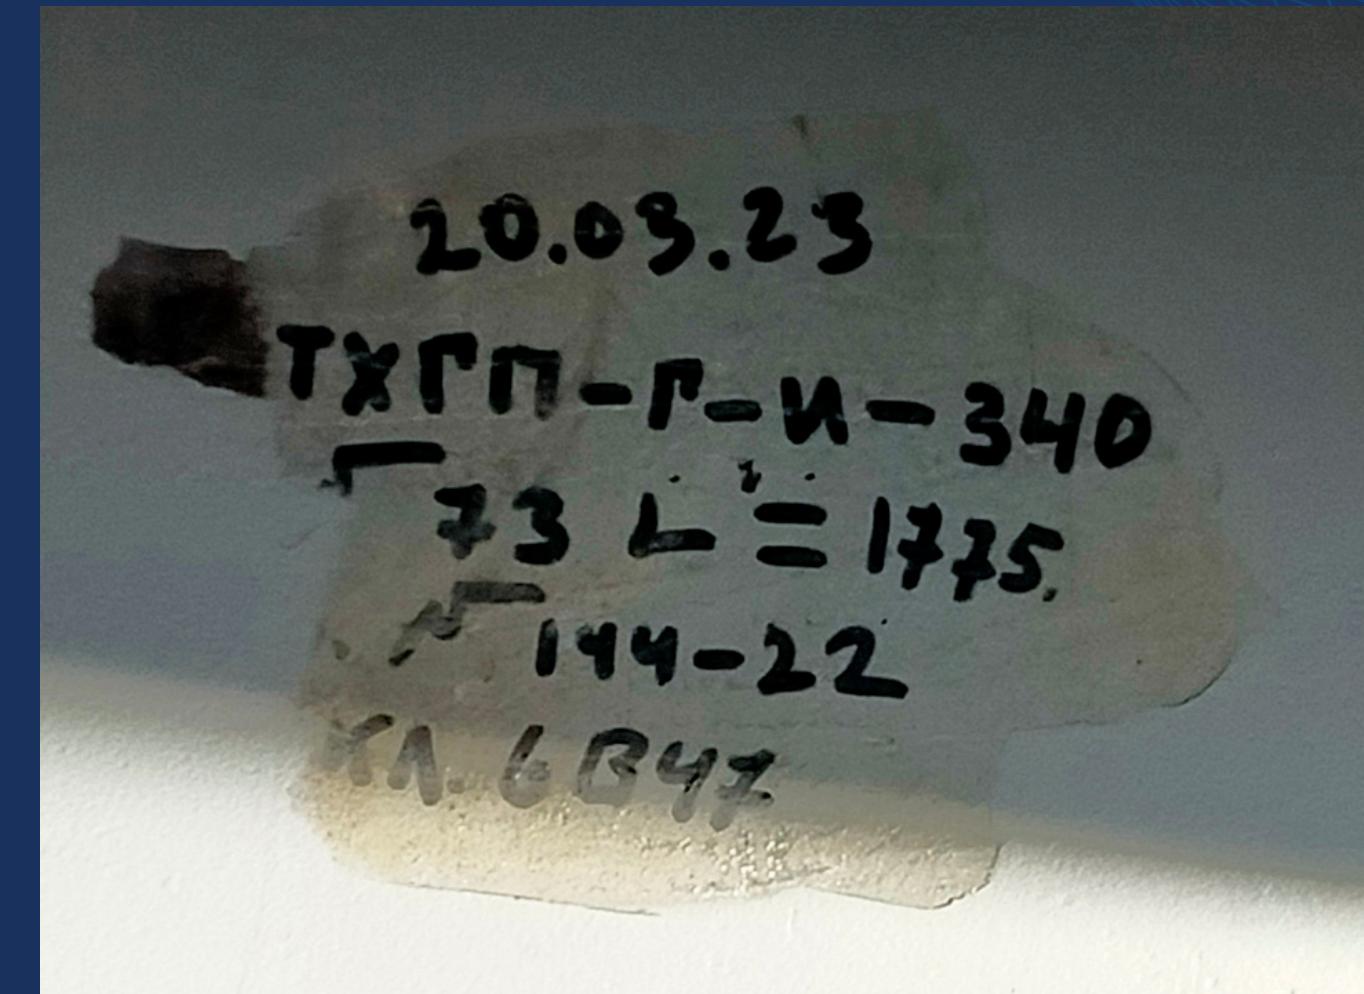

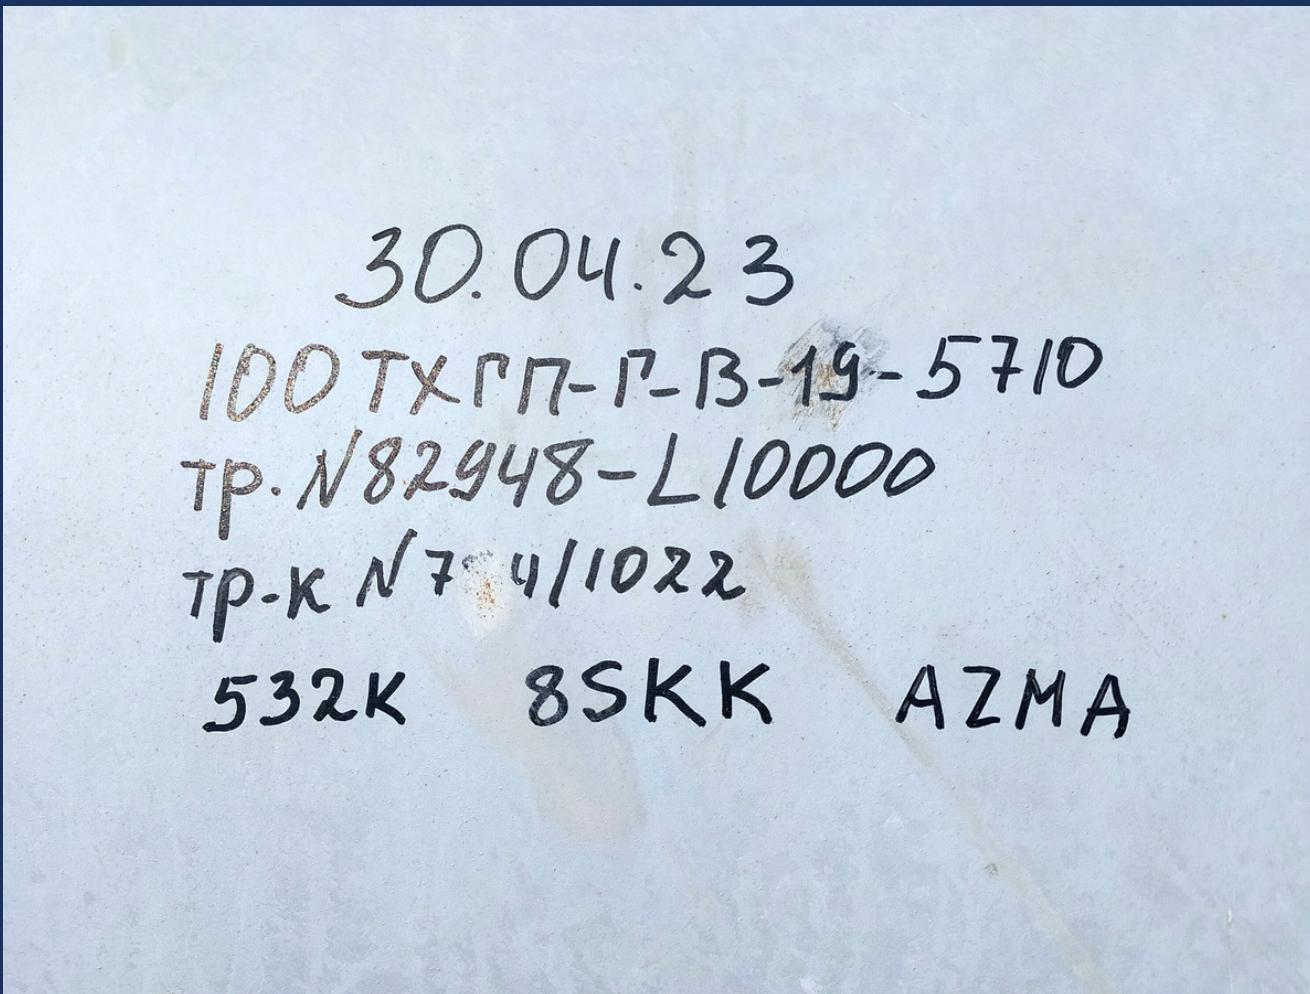

**RINAT  
MULLAKHMETOV**  
PRODUCT &  
CV MENTOR

**MIKHAIL  
MOSCHANETSKY**  
CV MENTOR

**MARK  
MARKOV**  
GAZSTROYPROM  
REPRESENTATIVE

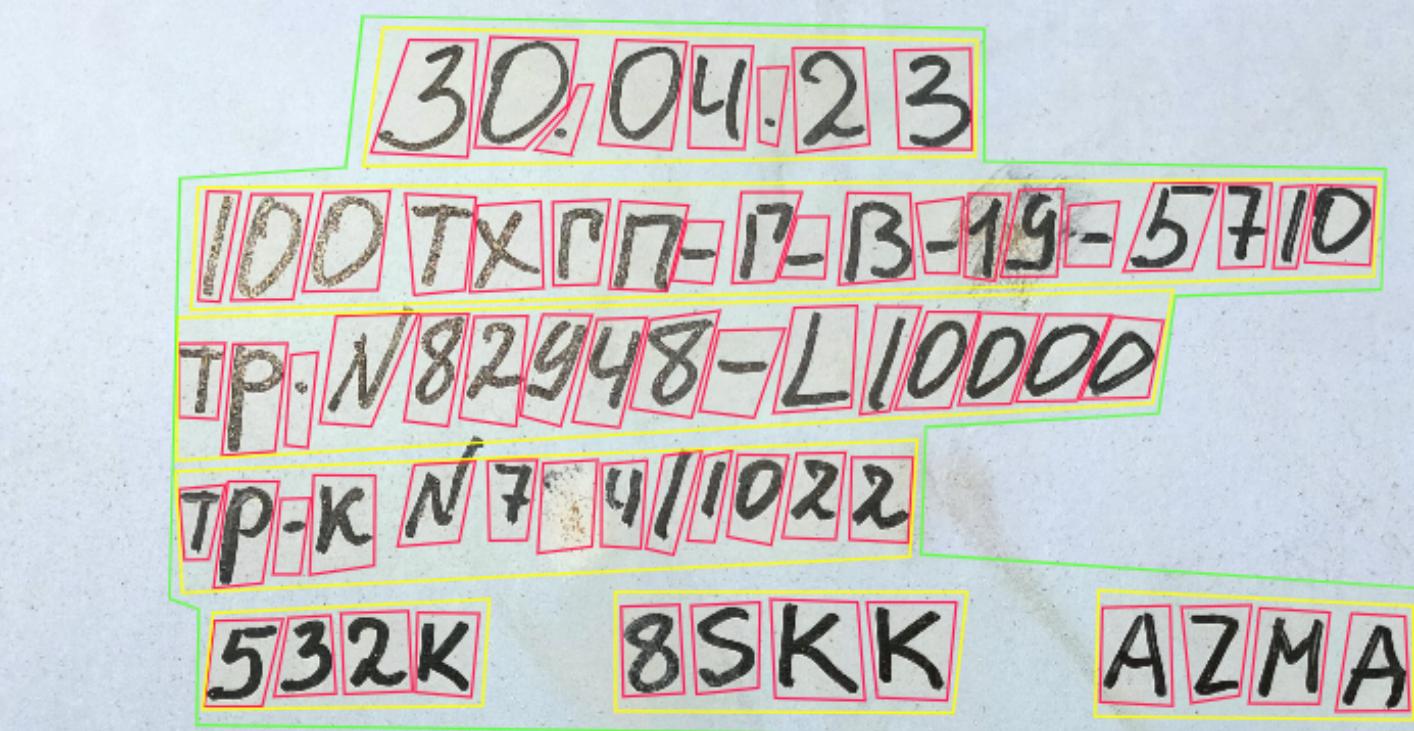

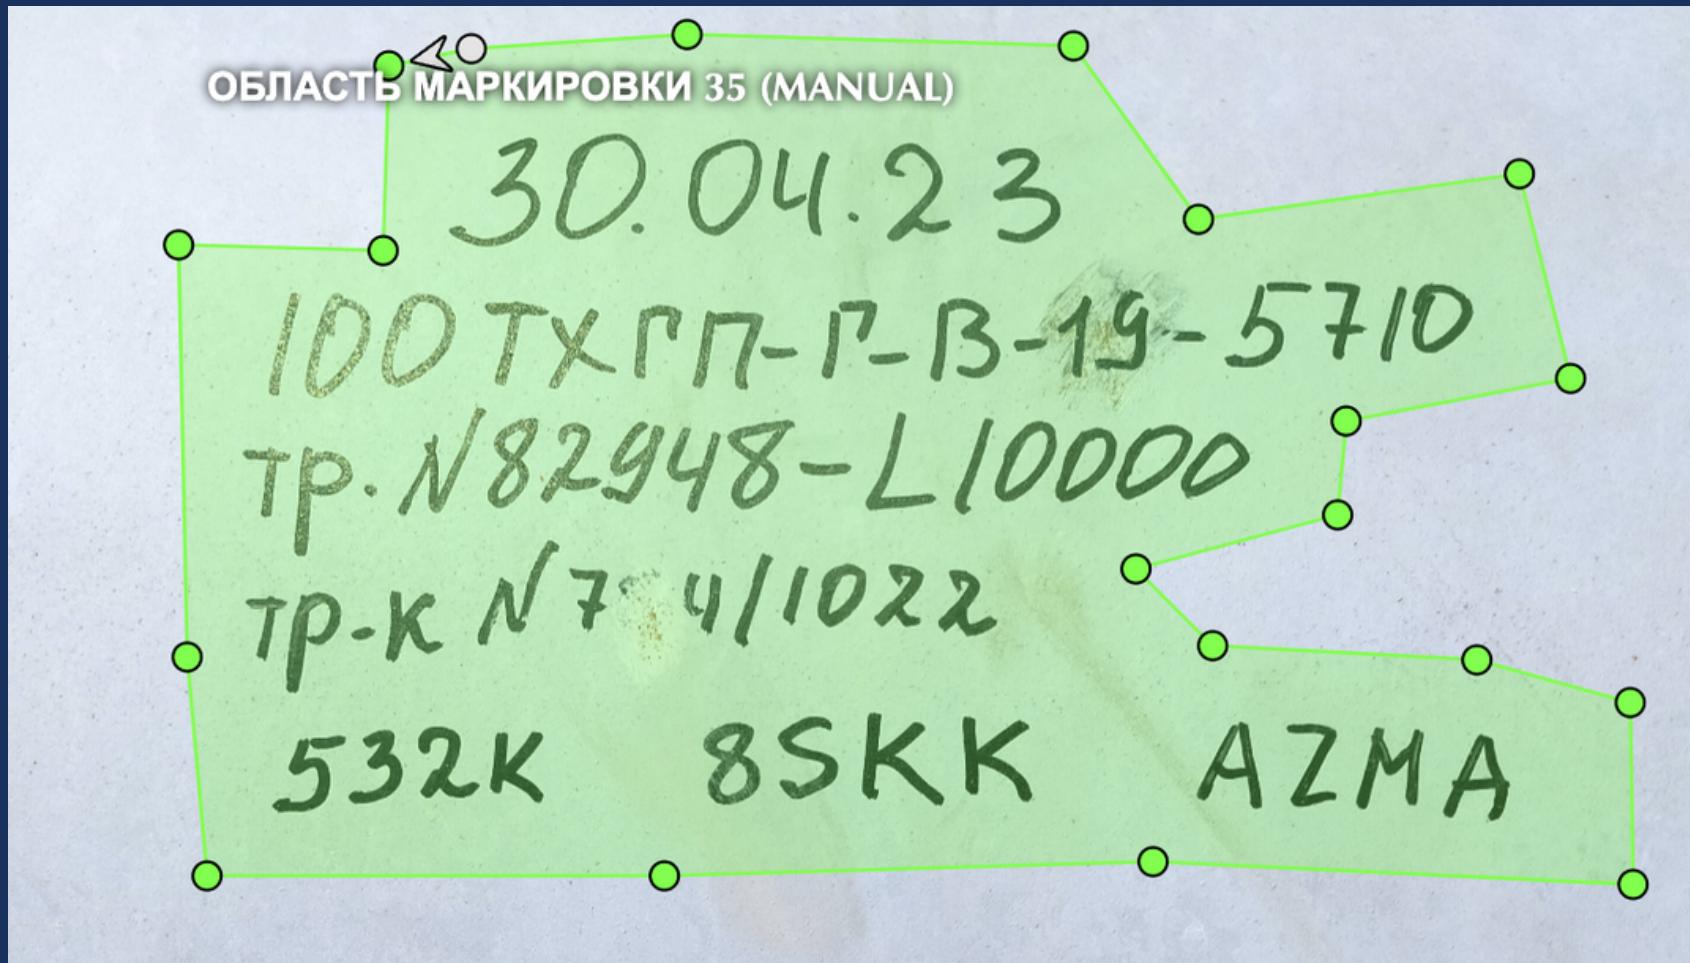

# Data marking

## ↖ Data Collection

# Data marking

## ❖ Data markup

# Computer vision

## ❖ Model

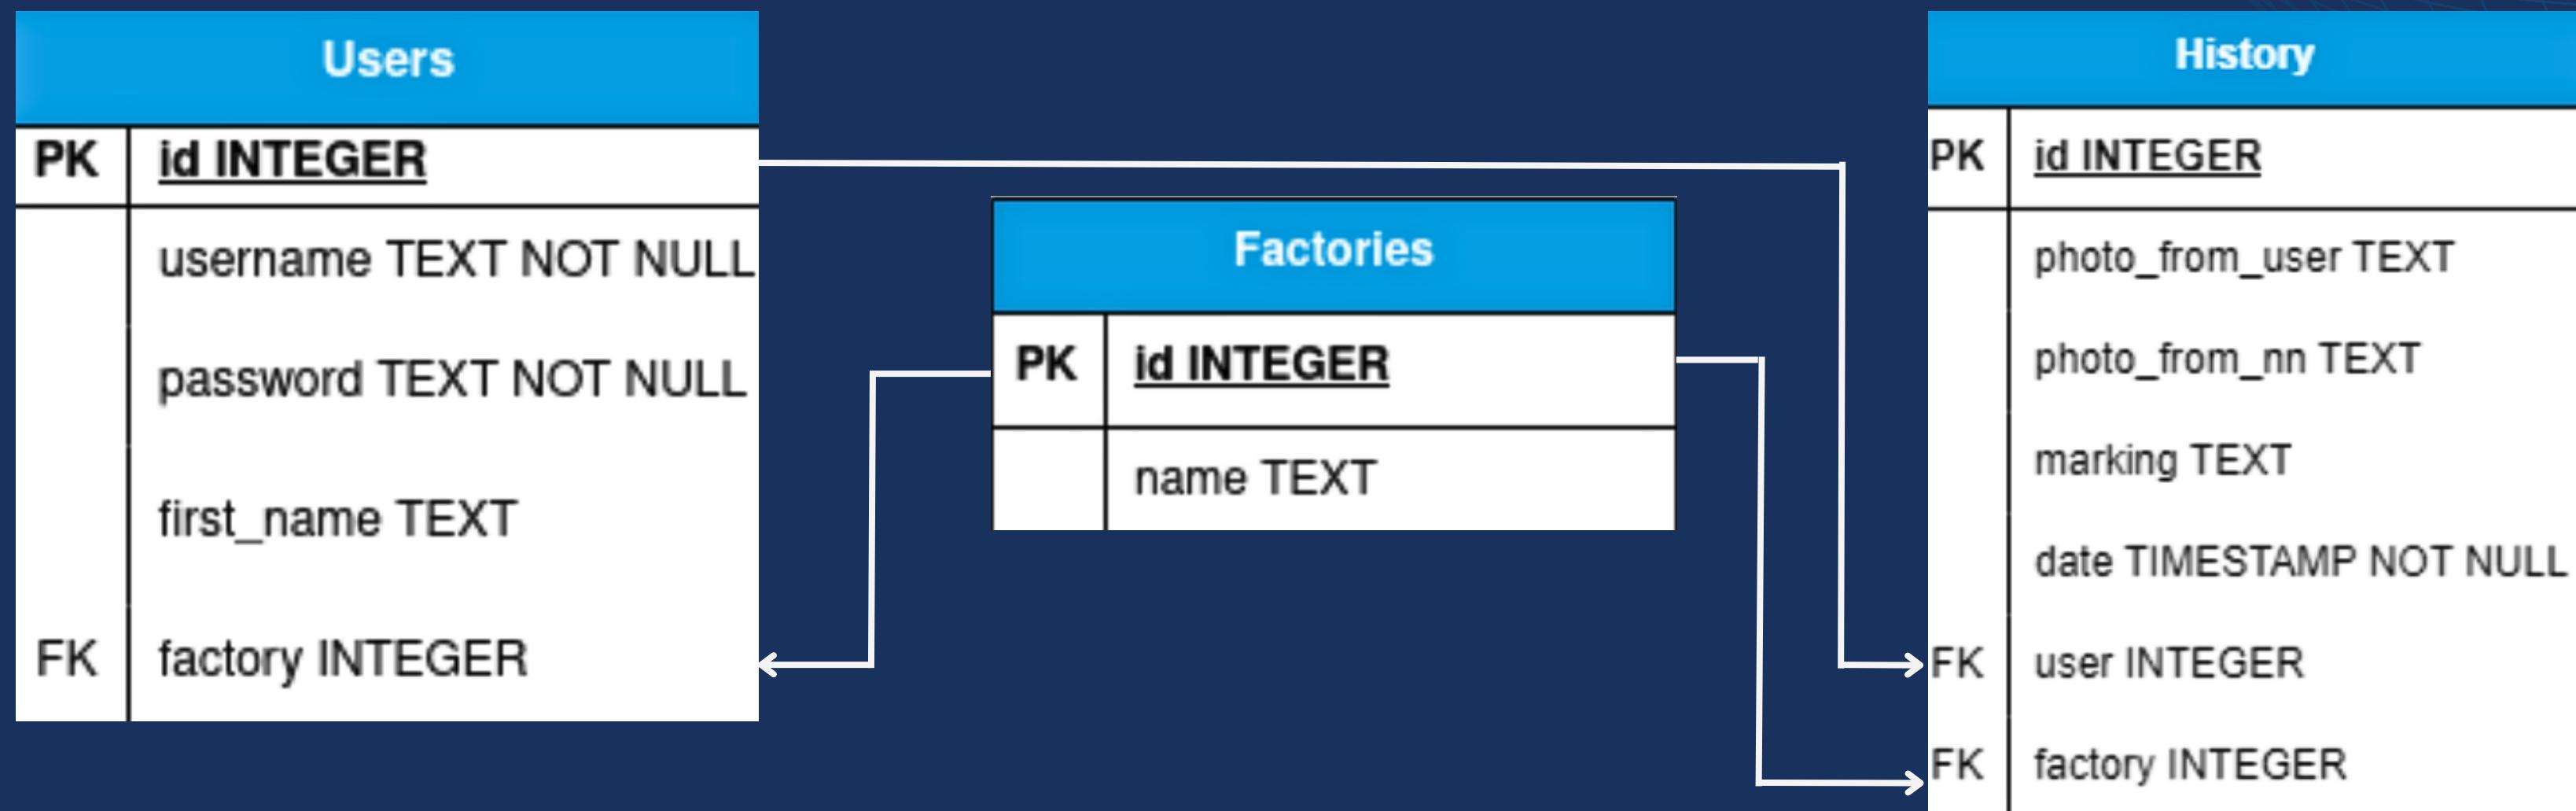

Existing CV models recognizing letters: PARSeq-SA, ABINet, TRBA, ViTSTR-S

## ❖ API

The communication with backend is made using FastAPI

# Database

## Schema

# Backend Development

## API

Main technology is popular framework FastAPI

## ORM models and schemas

ORM models were developed using SQLAlchemy python library,  
schemas – with Pydantic

## CRUD

Functions for creation, retrieval and update of information were  
developed with SQLAlchemy

# Development Operations

## Hosting

Whole solution is deployed on university servers

SCAN ME

# Development Operations

## ❖ Docker

Backend, frontend, database, and the recognition engine are wrapped in docker containers

## ❖ CI/CD

CI/CD pipeline is made in Innopolis University's GitLab

# Frontend Development

## ❖ Design

Clickable prototype of visual interface was created with Figma

## ❖ Technical Stack

Interface was developed with usage of TypeScript programming language and React framework

# Product demonstration

SCAN ME

# Conclusion

## ❖ Future Work

- Achieve higher computer vision model accuracy
- Add administration rights and functions such as abilities to create new users, assign them to factories
- Implement history expiration and open filtration for users

# THANKS

For Your Attention
